

## STOBER compact

**System technology  
for drives and  
automation**

**STOBER**

**STOBER compact**

**System technology for drives and automation**

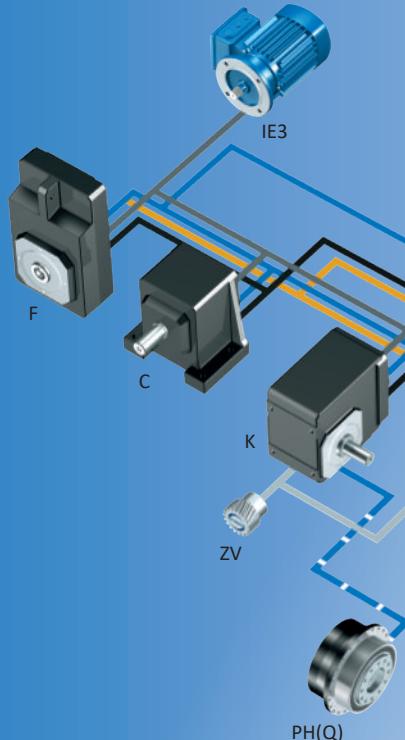

# One partner. All the possibilities.

STOBER has developed and produced excellent drive technology since 1934 and is active internationally with around 800 employees at 14 locations. STOBER impresses machine manufacturers in wide-ranging industries and markets around the world with tailor-made, highly efficient drive systems for demanding movements.

**"Our vision is to be the preferred partner for perfect movement."**

- Andreas Thiel, CEO of STÖBER Antriebstechnik.

## STOBER compact – what you can expect!

Take a look at the entire STOBER product range and learn what's essential to the STOBER drive system for perfect motion. The latest STOBER electronics, precise high-performance gear units, highly dynamic motors and super compact geared motors – connected via ready-to-use STOBER cable technology. Everything from a single source! It could not be more convenient.

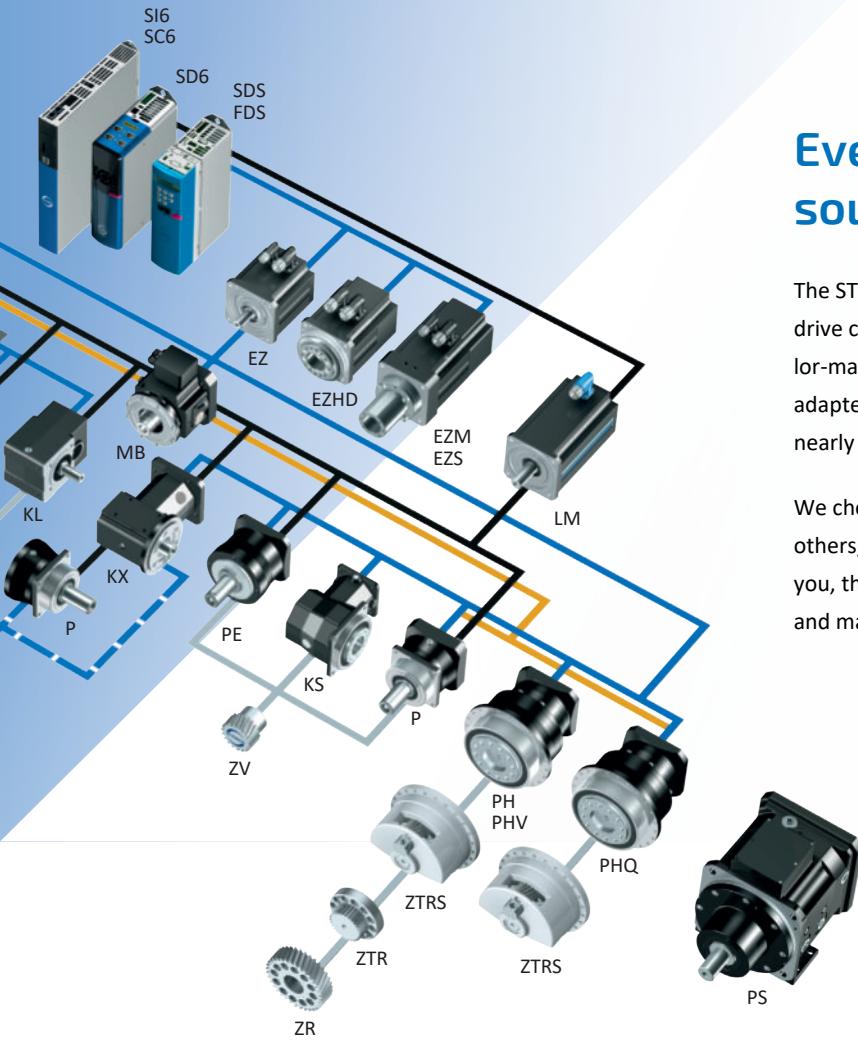

## At home in the world of demanding motion

Gear units

Geared motors

Motors

Cables and drive controllers

## Everything from a single source.

The STOBER drive system consisting of gear units, motors, cables and drive controllers has a modular design and is freely scalable—for tailor-made, compact and powerful machine concepts. It can be adapted to your individual requirements and combined as needed in nearly all industries and applications areas.

We check every single component and how it works together with others, taking on the responsibility for the complete drive train. For you, this means that one contact partner, certified operating safety and maximum availability are guaranteed.

### Need special solutions?

Numerous one-of-a-kind product highlights and project-related adjustments make it possible. With a holistic approach to your specific task, we work together on individualized solutions that are optimally coordinated to your requirements. Dedicated and solution-oriented in the support of your visions and projects.

### STOBER moves integrally and precisely.

"We put ideas in motion with passion and a great deal of dedication. In the process, we rely on our decades of experience and an exceptionally broad range of products. Our customers benefit from precise, practical system solutions with uncompromising quality and expert individual consultation."

- Patrick Stöber, CEO of STÖBER Antriebstechnik.

## STOBER moves as a team and with personality.

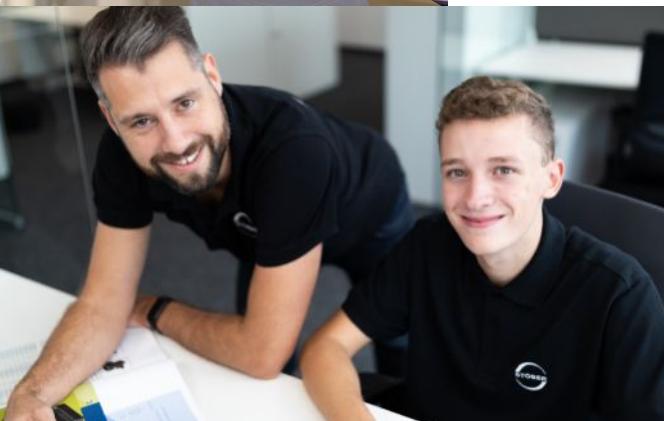

As a family-owned company, close relationships are extremely important to us. We build relationships with our employees, customers, and partners based on trust. We put people first.

We advocate for our employees' well-being, see things from our customers' perspectives, and demonstrate personal commitment to our mutual success.

"We have installed gear units, motors and drive controllers from STOBER in nearly all our systems. STOBER supports us in new projects from the first stroke of a pencil in the design phase until commissioning. Our years of cooperation are shaped by openness and honesty and emanate a rather special spirit. The technical consulting, the support—that is real, experienced partnership"

- Jürgen Leicht, Managing Partner of Leicht Stanzautomation.

## Working together. Worldwide. Successfully.

With an eye to the future, STOBER is facing the challenges of digitalization and investing in integrated solutions and a strong global production, sales and service presence. STOBER China was founded at the end of 2019. As a result, we are present in more than 40 countries around the world with eleven subsidiaries and 80 service partners.

STOBER drives  
Systems technology  
Taicang, China.

### Synchronous servo motors for screw drives

EZM

Synchronous servo motor for screw drives (direct drive for threaded nut)

#### Features

Designed for driving the ball-threaded nut of ball screws in accordance with DIN 69051-2.	✓
Axial angular contact ball bearing acting on two sides for direct absorption of the threaded spindle forces	✓
Super compact due to tooth-coil winding method with the highest possible copper fill factor	✓
Backlash-free holding brake (optional)	✓
Convection cooling	✓
Inductive EnDat absolute encoders	✓
Elimination of referencing with multi-turn absolute encoders (optional)	✓
Electronic nameplate for fast and reliable commissioning	✓
Rotating plug connectors with quick lock	✓

**Technical data**

Type	$n_N$ [rpm]	$M_N$ [Nm]	$I_N$ [A]	$P_N$ [kW]	$M_0$ [Nm]	$M_{max}$ [Nm]	$J_{dyn}$ [kgcm $^2$ ]

## 9.1 Drive controllers

**SC6**

Our more compact version for the encoderless Lean motor

### Features

- Sensorless position control of STOBER Lean motors
- Control of rotary synchronous servo motors, asynchronous motors and torque motors
- NEW: One Cable Solution EnDat 3
- Electronic motor nameplate via EnDat encoder interfaces
- Integrated EtherCAT or PROFINET communication
- STO safety technology using terminals or STO and SS1 using FSofE (Fail Safe over EtherCAT): SIL 3, PL e (cat. 4)
- Integrated brake control
- Single-ended nominal power consumption on double-axis controllers for operation of motors with different power
- Energy supply through direct power supply
- Flexible DC link connection for multi-axis applications

The compact stand-alone SC6 drive controller allows for sensorless control of Lean motors of the LM series. These motors provide energy efficiency at the performance level of synchronous servo motors. They also guarantee high investment protection, thanks to energy efficiency class IE5 and the corresponding higher efficiency compared to IE4 asynchronous motors. However, the SC6 can also be used in combination with asynchronous motors or synchronous servo motors with encoders (e.g. the EZ series). SC6 is available in three sizes with a nominal output current of up to 19 A: Sizes 0 and 1 as a double-axis controller, size 2 as a single-axis controller.

#### Technical data

Type	Baugröße	$I_{2N,PU}$ (4 kHz) [A]	$I_{2maxPU}$ (4 kHz) [A]	$I_{2N,PU}$ (8 kHz) [A]	$I_{2maxPU}$ (8 kHz) [A]	Dimensions [mm]
SC6A062	0	2 × 4.5	2 × 9.5	2 × 4	2 × 10	373 × 45 × 265
SC6A162	1	2 × 10	2 × 21	2 × 9	2 × 22.5	373 × 65 × 286
SC6A261	2	19	39.9	15	37.5	373 × 65 × 286

#### Applications

Drive-based motion control is recommended for the decentralized motion control of sophisticated machines.

The drive-based application package from STOBER is the right choice wherever universal and flexible solutions are needed. The Drive Based application provides drive-based motion control for positioning, velocity and torque/force with the PLCopen Motion Control command set. These standard commands have been combined into operating modes for different applications and supplemented with additional functions such as motion block linking, cams and much more. For the command operating mode, all properties of the movements are specified directly by the controller. The properties of the movements in the drive are predefined in the motion block operating mode so that only a start signal is necessary to perform the movement. Linking can be used to define complete motion sequences. There is a separate operating mode available for applications controlled by velocity or torque/force such as pumps, fans or conveyor belts. This also allows for operation without a controller.

In addition, the CiA 402 application is also available, which includes both the controller-based and drive-based operating modes (csp, csv, cst, ip, pp, pv, pt).

#### Encoder interfaces

- EnDat 3 (OCS)
- EnDat 2.2 digital
- Incremental
- SSI
- Resolver
- Pulse/direction signals

#### Further information

SC6 Drive Controller

<http://www.stoeber.de/en/SC6>

## 9.2 Drive controllers

SI6

Drive control in a multi-axis drive system

### Features

- Sensorless position control of STOBER Lean motors
- Control of rotary synchronous servo motors, asynchronous motors and torque motors
- NEW: One Cable Solution EnDat 3
- Electronic motor nameplate via EnDat encoder interfaces
- Integrated EtherCAT or PROFINET communication
- STO safety technology using terminals or STO and SS1 using FSoE (Fail Safe over EtherCAT): SIL 3, PL e (cat. 4)
- Integrated brake control
- Energy supply over DC link connection
- Single-ended nominal power consumption on double-axis controllers for operation of motors with different power
- Variable feed-in power using supply modules that can be connected in parallel

The completely re-designed STOBER multi-axis drive system consists of the SI6 drive controller and PS6 supply module combination. Matching Quick DC-Link modules handle the energy supply for the networked drive controllers. The SI6 drive controller is available in four sizes as a single or double-axis controller with a nominal output current of up to 50. The PS6 supply module is available in three sizes with a nominal power of 10 kW to 50 kW. As an economically attractive system with a minimized device width, the SI6 opens a new dimension in multi-axis applications.

#### Technical data

Type	Baugröße	$I_{2N,PU}$ (4 kHz) [A]	$I_{2max,PU}$ (4 kHz) [A]	$I_{2N,PU}$ (8 kHz) [A]	$I_{2max,PU}$ (8 kHz) [A]	Dimensions [mm]
SI6A061	0	5	10.5	4.5	11.3	373 x 45 x 265
SI6A062	0	2 x 5	2 x 10.5	2 x 4.5	2 x 11.3	373 x 45 x 265
SI6A161	1	12	25.2	10	25	373 x 65 x 286
SI6A162	1	2 x 12	2 x 25.2	2 x 10	2 x 25	373 x 65 x 286
SI6A261	2	22	46.2	20	50	373 x 65 x 286
SI6A262	2	2 x 25	2 x 52.5	2 x 20	2 x 50	373 x 105 x 286
SI6A361	3	50	105	40	100	373 x 105 x 286

#### Applications

Controller-based motion control is recommended for the central motion control of complex machines.

Using the controller-based operating modes of the CiA 402 application, you can implement applications with synchronized, cyclic set value specification (csp, csv, cst, ip) by a motion controller. In addition, the drive controllers can also independently handle motion tasks, such as referencing and jogging during commissioning.

Drive-based Drive Based and Drive Based Synchronous applications and drive-based operating modes (pp, pv, pt) of the CiA 402 application are also available for torque/force mode, velocity mode or positioning mode.

#### Encoder interfaces

- EnDat 3 (OCS)
- EnDat 2.2 digital
- Incremental
- SSI

## 9.3 Drive controllers

**SD6**

High performance and flexibility

### Features

- Control of linear and rotary synchronous servo motors and asynchronous motors
- Multi-functional encoder interfaces
- Automatic motor parameterization from the electronic motor nameplate
- Isochronic system bus (IGB motion bus) for parameterization and multi-axis applications
- Communication over CANopen, EtherCAT or PROFINET
- Safe Torque Off (STO) in the standard version, expanded safety technology (SS1, SS2, SLS, etc.) as an option
- Digital and analog inputs and outputs as an option
- Brake chopper, brake control and line filter
- Energy supply through direct power supply
- Flexible DC link connection for multi-axis applications
- Convenient operating unit consisting of graphical display and keys
- Paramodul removable data storage for quick commissioning and service

STOBER drive controllers of the SD6 series offer maximum precision and productivity for automation technology and mechanical engineering despite ever more complex functions. Highly dynamic drives ensure the shortest recovery times from fast changes in set value and load jumps. There is also an option of connecting the drive controllers in a DC link for multi-axis applications, which improves the energy footprint of the entire system. The SD6 drive controller is available in four sizes with a nominal output current of up to 85 A.

#### Technical data

Type	Baugröße	$I_{2N,PU}$ (4 kHz) [A]	$I_{2maxPU}$ (4 kHz) [A]	$I_{2N,PU}$ (8 kHz) [A]	$I_{2maxPU}$ (8 kHz) [A]	Dimensions [mm]
SD6A02	0	4	7.2	3	7.5	300 × 70 × 194

SD6A38	3	85	153	60	150	382.5 × 190 × 303

#### Applications

Drive-based motion control is recommended for the decentralized motion control of sophisticated machines.

The drive-based application package from STOBER is the right choice wherever universal and flexible solutions are needed. The Drive Based Synchronous application provides drive-based motion control for synchronous operation, positioning, velocity and torque/force with the PLCopen Motion Control command set. These standard commands have been combined into operating modes for different application cases and supplemented with additional functions such as motion block linking or cams. For the command operating mode, all properties of the movements are specified directly by the controller. The properties of the movements in the drive are predefined in the motion block operating mode so that only a start signal is necessary to perform the movement. Linking can be used to define complete motion sequences.

In addition, the CiA 402 application is also available, which includes both the controller-based and drive-based operating modes (csp, csv, cst, ip, pp, pv, pt).

#### Encoder interfaces (standard)

- EnDat 2.1/2.2 digital
- Incremental
- SSI

#### Encoder interfaces (optionally available)

- Resolver
- Pulse/direction signals
- EnDat 2.1 sin/cos
- Sin/cos

#### Expanded safety option

In addition to the safe stop functions Safe Stop 1 (SS1) and Safe Stop 2 (SS2), additional safety functions such as Safely-Limited Speed (SLS), Safe Brake Control (SBC), Safe Brake Test (SBT), Safe Direction (SDI) and Safely-Limited Increment (SLI) are also available.

## 9.4 Servo inverters

### POSIDYN SDS 5000

High dynamics for fully digital servo axes

#### Features

- Control of rotary synchronous servo motors and asynchronous motors
- Multi-functional encoder interfaces
- Automatic motor parameterization from the electronic motor nameplate
- Isochronic system bus (IGB motion bus) for parameterization and multi-axis applications
- Communication using PROFIBUS DP, PROFINET, CANopen or EtherCAT
- Safe Torque Off (STO) and Safe Stop 1 (SS1) safety functions: SIL 3, PL e (cat. 3)
- Digital and analog inputs and outputs as an option
- Brake chopper, brake control and line filter
- Convenient operating unit consisting of plain-text display and buttons
- Paramodul removable data storage

The SDS 5000 servo inverter is the most powerful inverter of the 5th STOBER inverter generation. It also offers the option of remote maintenance on par with on-site service work as well as a self-configuring isochronic system bus (IGB motion bus) for communication between up to 32 servo inverters. SDS 5000 can be ordered in four sizes with a nominal output current up to 85 A and a power range up to 45 kW.

#### Technical data

Type	Baugröße	$I_{2N,PU}$ (4 kHz) [A]	$I_{2max,PU}$ (4 kHz) [A]	$I_{2N,PU}$ (8 kHz) [A]	$I_{2max,PU}$ (8 kHz) [A]	Dimensions [mm]

SDS5150A	2	32	57.6	20	50	300 × 105 × 260
SDS5220A	3	44	79.2	30	75	382.5 × 190 × 276
SDS5370A	3	70	126	50	125	382.5 × 190 × 276
SDS5450A	3	85	153	60	150	382.5 × 190 × 276

#### Applications

Drive-based motion control is recommended for the decentralized motion control of sophisticated machines.

Standard drive-based applications are available for torque/force, velocity or positioning mode for series of the 5th STOBER inverter generation. For multi-axis applications, master/slave mode is possible in the standard version. The electronic cam disk tailor-made application is available as an alternative.

#### Encoder interfaces (standard)

- EnDat 2.1/2.2 digital
- Incremental
- SSI

#### Encoder interfaces (optionally available)

- Resolver
- Pulse/direction signals
- EnDat 2.1 sin/cos

## 9.5 Frequency inverters

### POSIDRIVE FDS 5000

The purpose-built asynchronous servo axis

#### Features

- Control of rotating asynchronous motors
- Interface for incremental encoder (HTL/TTL)
- Communication using PROFIBUS DP, PROFINET, CANopen or EtherCAT
- Safe Torque Off (STO) and Safe Stop 1 (SS1) safety functions: SIL 3, PL e (cat. 3)
- Digital and analog inputs and outputs
- Brake chopper and line filter
- Convenient operating unit consisting of plain-text display and buttons
- Paramodul removable data storage for quick commissioning and service

The FDS 5000 frequency inverter from the 5th STOBER inverter generation was optimized for asynchronous geared motors and offers practical functionality for modern positioning and controller drives. It comes ready for fast fieldbus communication with different systems. FDS 5000 can be ordered in two sizes with a nominal output current up to 16 A and a power range up to 7.5 kW.

#### Technical data

Type	Baugröße	$I_{2N,PU}$ (4 kHz) [A]	$I_{2max,PU}$ (4 kHz) [A]	$I_{2N,PU}$ (8 kHz) [A]	$I_{2max,PU}$ (8 kHz) [A]	Dimensions [mm]

## 9.6 Connection method

Coordinated connection methods for STOBER drive controllers

### Features

- Torsional stress  $\pm 30^\circ/\text{m}$
- Bending resistance
- Oil resistance
- Chemical resistance

A drive controller, cable and motor that are not coordinated with one another can lead to impermissibly high voltage peaks in the drive system, which may cause damage to the motor. The legal requirements of (EMC) Directive 2014/30/EU must also be observed.

Combining STOBER motors, STOBER cables and STOBER drive controllers enables you to comply with these legal requirements.

STOBER offers a range of cables to match. Cables are available in different lengths and are ready-made on both ends.

Using unsuitable connection cables may void any claims made under the warranty.

**Power cables**

Design		Motor plug connector size			
		con.15	con.23	con.40	con.58
Quick lock		✓			
speedtec quick lock			✓	✓	
Screw technology			On request	On request	✓
Power cores (3 + PE)	Brake cores	Temperature sensor cores	Cable Ø	Bending radius 1 (min.)	Bending radius 2 (min.)
4 × 1.0 mm <sup>2</sup>	2 × 0.5 mm <sup>2</sup>	2 × 0.34 mm <sup>2</sup>	Max. 10.1 mm	101.0 mm	50.5 mm
4 × 1.5 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	2 × 0.5 mm <sup>2</sup>	Max. 12.2 mm	122.0 mm	61.0 mm
4 × 2.5 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	Max. 15.0 mm	150.0 mm	75.0 mm
4 × 4.0 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	2 × 0.75 mm <sup>2</sup>	Max. 16.0 mm	160.0 mm	80.0 mm
4 × 6.0 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	Max. 19.4 mm	194.0 mm	97.0 mm
4 × 10.0 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	2 × 1.0 mm <sup>2</sup>	Max. 23.5 mm	235.0 mm	117.5 mm
4 × 16.0 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	Max. 24.0 mm	180.0 mm	96.0 mm
4 × 25.0 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	2 × 1.5 mm <sup>2</sup>	Max. 27.5 mm	206.3 mm	110.0 mm

Bending radius: 1 = free to move, 2 = fixed installation

**Encoder cables**

Design		Motor plug connector size			
		con.15	con.17	con.23	
Quick lock		✓			
speedtec quick lock			✓	✓

# 11 Appendix

## 11.1 Formula symbols

$C_2$	Nm/arcmin	Torsional stiffness relative to the gear unit output
$\Delta$	–	Delta connection
$\Delta\phi_2$	arcmin	Backlash at the output shaft with a blocked input
$\Delta s$	mm	Linear backlash resulting from the backlash of the gear unit
$\eta$	%	Efficiency
$F_{ax}$	N	Permitted axial force on the output
$F_{f2acc}$	kN	Permitted acceleration feed force at the gear unit output
$i$	–	Gear ratio
$I_{2maxPU}$	A	Maximum output current of the power unit
$I_{2N,PU}$	A	Nominal output current of the power unit
$I_N$	A	Nominal current
$J_{dyn}$	kgcm <sup>2</sup>	Mass moment of inertia of a motor in dynamic operation
$m$	kg	Weight (for gear units without lubricant)
$M_0$	Nm	Stall torque: The continuous torque the motor is able to deliver at a speed of 10 rpm (tolerance ±5%)
$M_{2,0}$	Nm	Stall torque on the gear unit output
$M_{2acc}$	Nm	Maximum permitted acceleration torque on the gear unit output
$M_{2max}$	Nm	Maximum torque at the gear unit output
$M_{2N}$	Nm	Nominal torque on the gear unit output (relative to $n_{1N}$ )
$M_{max}$	Nm	Maximum torque: the maximum permitted torque the motor is able to deliver over a short period (when accelerating or decelerating) (tolerance ±10%)
$m_n$	mm	Module
$M_N$	Nm	Nominal torque: the maximum torque of a motor in S1 mode at nominal speed $n_N$ (tolerance ±5%)
$n_{1max}$	rpm	Maximum permitted input speed
$n_{1maxZB}$	min <sup>-1</sup>	Maximum permitted input speed of the gear unit in cyclic operation
$n_2$	rpm	Speed at the gear unit output
$n_N$	rpm	Nominal speed: The speed for which the nominal torque $M_N$ is specified
$P_N$	kW	Nominal power: the power the motor is able to deliver long term in S1 mode at the nominal point (tolerance ±5 %)
$P_{N,GB}$	kW	Nominal power of the two-speed gearbox
$v_{f2maxZB}$	m/s	Maximum feed velocity at the gear unit output at $n_{1maxZB}$
$\gamma$	–	Star connection
$z$	–	Number of teeth

## 11.2 Trademarks

The following names used in connection with the device, its optional equipment and its accessories are trademarks or registered trademarks of other companies:

CANopen®	CANopen® and CiA® are registered European Union trademarks of CAN in AUTOMATION e.V., Nuremberg, Germany.
CiA®	
CODESYS®	CODESYS® is a registered trademark of 3S-Smart Software Solutions GmbH, Kempten, Germany.
EnDat®	EnDat® and the EnDat® logo are registered trademarks of Dr. Johannes Heidenhain GmbH, Traunreut, Germany.
EtherCAT®, Safety over EtherCAT®, TwinCAT®	EtherCAT®, Safety over EtherCAT® and TwinCAT® are registered trademarks of patented technologies licensed by Beckhoff Automation GmbH, Verl, Germany.
HIPERFACE®	HIPERFACE® and the HIPERFACE DSL® logo are registered trademarks of SICK STEGMANN GmbH, Donaueschingen, Germany.
Intel®, Intel® Atom™, Intel® Core™	Intel®, the Intel® logo, Intel® Atom™ and Intel® Core™ are registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.
speedtec®	speedtec® is a registered trademark of TE Connectivity Industrial GmbH, Niederwinkling, Germany.
PROFIBUS®, PROFINET®	The PROFIBUS and the PROFINET logo are registered trademarks of PROFIBUS Nutzerorganisation e.V., Karlsruhe, Germany.

## 11.3 Sales terms and delivery conditions

You can find our current sales terms and delivery conditions at <http://www.stoeber.de/en/gtc>.

## 11.4 Publication details

STOBER compact catalog ID 442655\_en.

You can find current versions of PDF files online at <http://www.stoeber.de/en/downloads/>.

## 11.5 Explanation of product abbreviations

### Gear unit

Series/Product	Product designation
C	Helical gear unit
F	Offset helical gear unit
K	Helical bevel gear unit
KL	Compact helical bevel gear unit
KS	Right-angle servo gear unit
P	Planetary gear unit
PE	Cost-efficient planetary gear unit
PH	Planetary gear unit with flange shaft
PHK	Right-angle planetary gear unit with flange shaft
PHKX	Planetary gear unit with flange shaft and single-stage helical bevel gear unit
PHQ	Planetary gear unit with flange shaft and 4-planet system
PHQK	Right-angle planetary gear unit with flange shaft and 4-planet system
PHV	Planetary gear unit with large gear ratio
PK	Right-angle planetary gear units
PKX	Planetary gear unit with single-stage helical bevel gear unit
PS	Two-speed gearboxes
ZRPH	PH planetary gear unit rack and pinion drive with screwed pinion
ZTRPH	PH planetary gear unit rack and pinion drive with screwed flange pinion
ZTRPHV	PHV planetary gear unit rack and pinion drive with screwed flange pinion
ZTRSPH	PH planetary gear unit rack and pinion drive with supporting bearing holder
ZTRSPHQ	PHQ planetary gear unit rack and pinion drive with supporting bearing holder
ZTRSPHV	PHV planetary gear unit rack and pinion drive with supporting bearing holder
ZVK	K helical bevel gear unit rack and pinion drive with plug-on pinion
ZVKL	KL compact helical bevel gear unit rack and pinion drive with plug-on pinion
ZVKS	KS right-angle servo gear unit rack and pinion drive with plug-on pinion
ZVP	P planetary gear unit rack and pinion drive with plug-on pinion
ZVPE	PE cost-efficient planetary gear unit rack and pinion drive with plug-on pinion

### Motor adapter / input shaft

Series/Product	Product designation
MB	Motor adapter with ServoStop brake
ME	Motor adapter with EasyAdapt coupling
MEL	Motor adapter with EasyAdapt coupling for large motors
MF	Motor adapter with FlexiAdapt coupling
MFL	Motor adapter with FlexiAdapt coupling for large motors
MQ	Motor adapter with backlash-free plug-in coupling
MR	Round motor adapter with curved tooth coupling

### Motors

Series/Product	Product designation
EZ	Synchronous servo motor
EZHD	Synchronous servo motor with hollow shaft
EZM	Synchronous servo motor for screw drives (direct drive for threaded nut)
EZS	Synchronous servo motors for screw drives (direct drive for threaded spindle)
IE3D	Asynchronous motor in energy efficiency class IE3
LM	Lean motor

## Electronics

Series/Product	Product designation	Product affiliation
AES	Absolute Encoder Support; battery module for buffering the supply voltage when using encoders with battery-buffered multi-turn stage	Drive controllers of 5th/6th gen.
AP6	Adapter in various designs for connecting encoder cables	Drive controllers of 6th gen.
ASP 5001	Safety module for STO over terminals	Drive controllers of 5th gen.
AX 5000	POSIswitch axis switcher for sequential operation of up to 4 synchronous servo motors	MDS 5000, SDS 5000
BRM 5000	Brake module for controlling a brake and for connecting to the shield of the power cable	FDS 5000, MDS 5000
BRS 5001	Brake module for controlling up to 2 brakes and for connecting to the shield of the power cable	SDS 5000
CA6	Communication module for the CANopen connection	SD6
CAN 5000	Communication module for the CANopen connection	Drive controllers of 5th gen.
Control box	Operating device for parameterization and configuration of inverters	Inverters of the 4th gen., FDS 5000, MDS 5000
DL6A	Quick DC-Link rear section module for the DC link connection	SD6
DL6B	Quick DC-Link rear section module for the DC link connection	SC6, SI6, PS6
DP 5000	Communication module for the PROFIBUS connection	Drive controllers of 5th gen.
DS6	DriveControlSuite; project configuration and commissioning software for drive controllers	Drive controllers of 6th gen.
EC6	Communication module for the EtherCAT connection	SD6
EM 5000	EMC shroud for connecting to the shield of the power cable	Drive controllers of 5th gen.
EM6	EMC shroud for connecting to the shield of the power cable	SD6
ECS 5000	Communication module for the EtherCAT connection	Drive controllers of 5th gen.
FDS 5000	POSIDRIVE frequency inverter of the 5th generation for operating asynchronous motors	
HT6	Adapter for level conversion from HTL signals to TTL signals	SC6, SI6
IO6	Terminal module for connecting analog and digital signals	SD6
LEA 5000	Terminal module for connecting digital signals	FDS 5000
Paramodul	Removable data storage for quick commissioning and service	Drive controllers of 5th/6th gen.
PN 5000	Communication module for the PROFINET connection	Drive controllers of 5th gen.
PN6	Communication module for the PROFINET connection	SD6
POSITool	Project configuration und commissioning software for drive controllers	Drive controllers of 5th gen.
PS6	Supply module for multi-axis drive systems	SI6
RB 5000	Rear section braking resistor	Drive controllers of the 5th gen., SD6
REA 5001	Terminal module for connecting analog and digital signals as well as encoders and resolvers	MDS 5000, SDS 5000
RI6	Terminal module for connecting analog and digital signals as well as encoders and resolvers	SD6
SC6	Compact drive controller of the 6th generation for operating synchronous and asynchronous servo axes (with power supply and additional control mode for Lean motors)	

SD6	High-performance drive controller of the 6th generation with modular interface concept for operating synchronous and asynchronous servo axes (with power supply and additional control mode for linear motors)	
SDS 5000	Powerful POSIDYN servo inverter of the 5th generation	
SE6	Safety module for expanded safety technology (speed and position functions, safe brake management)	SD6
SEA 5001	Terminal module for connecting analog and digital signals	MDS 5000, SDS 5000
SI6	Compact drive controller of the 6th generation for multi-axis drive systems for operating synchronous and asynchronous servo axes (with DC supply and additional control mode for Lean motors)	
SR6	Safety module for STO over terminals, electronic and free of wear	SC6, SI6
ST6	Safety module for STO over terminals, electronic and free of wear	SD6
SY6	Safety module for STO and SS1 using FSOfE, electronic and free of wear	SC6, SI6
SZ6	Option module without safety functions for bridging the safety-relevant interface of the drive controller	SC6, SI6
XEA 5001	Expanded terminal module for connecting analog and digital signals as well as encoders	MDS 5000, SDS 5000
XI6	Expanded terminal module for connecting analog and digital signals as well as encoders	SD6
